

IV Object Left Detector

Overview

Intelligent Object Left Detector is a powerful, easy-to-deploy "intelligent video" application. This product analyzes video in real-time and provide alerts and outputs based on customer requirements.

Object Left Detector continuously monitors any area to detect objects or items that have been left unattended for too long in the scene. Item size and time limits can be set by the user.

Object Left Detector looks for objects that are not part of the "normal" scene and issues real-time alerts upon detecting exceptions.

Object Left Detector can be deployed at airports, train stations, national infrastructure facilities, public places, and other secure areas to detect unattended baggage and suspicious looking objects left in the scene.

Benefits

IV Object Left Detector offers the following benefits:

- Provides a modular approach to video analytics. These products can be configured and deployed in minutes.
- Detects exception conditions or threats in real-time allowing security professionals to respond in a timely manner.
- Gathers extensive video intelligence and event information for review and analysis
- Provides comprehensive 24/7/365 coverage
- Deters criminals and law breakers by detecting abnormal situations proactively
- Increases productivity and efficiency of security professionals.

IV Object Left Detector

Features

IV Object Left Detector has powerful and flexible features:

Input: Works with a wide range of analog, IP/Network and digital cameras. It can also take video input from many DVR and NVR/video management solutions. The software accepts raw uncompressed video and MPG1, MPG4, MJPG, H264 and AVI video formats.

Output: IV Object Left Detector provides real-time event outputs and alerts. Event information includes event type and priority, object type and ID, color, size, position, speed, time, images and more. The system supports extensive alerting and output capabilities:

- Output relay I/O and contact closures
- XML and IP messages
- LAN or USB outputs
- Email, pager and phone alerts
- Output to databases or files (XML, Excel, TXT)
- Integration with External systems using IP, XML and ODBC standards
- Customized Reports

Applications

IV Object Left Detector can be used for:

- Airport, Ports, Trains, Subway stations, Maritime and Government institutions.
- Border Control and Perimeter protection
- Critical infrastructure, nuclear facilities
- Landmarks, Bridges, Parks, Monuments etc.
- Enterprise and commercial security
- Entertainment, Casinos and Gaming
- Retail stores
- Financial Institutions and Banks
- Urban and Public area monitoring

Hardware Specifications

IV Object Left Detector is available in the following full solution or Software only configurations:

Full Solution (Hardware and Software)

1. **Rackmount Server.** This is provided on a 1U or 2U Rackmount server with pre-installed software. Customers can add cameras and monitors of their choice to deploy the system.

System requirements:

- Dual-Core/Quad-Core Processor
- 1-2GB Memory
- 120-240 GB Hard disk, based on channels
- 1G Ethernet
- Windows XP OS

Software Only:

2. **IV Object Left Detector Software.** The full IV Object Left Detector application software can be purchased and deployed on PC based servers.

External System Integration:

3. **Software (API/SDK).** This option is available for OEMs that would like to embed IV Object Left Detector capabilities into their own video management software, DVR, NVR or other application. IntelliVision provides C++, ActiveX and Direct Show based API/SDK for integration.

About IntelliVision

IntelliVision is a leader in "Video Intelligence and Automated Monitoring" solutions for Security & Surveillance markets. Our products have been successfully deployed at several Government and Enterprise customers providing high reliability and running 24/7/365. IntelliVision is headquartered in USA with offices in Europe & Asia
